
Canteen Management Strategy

1. Purpose

The purpose of this Canteen Management Strategy is to improve operational efficiency (inventory control), food quality, quantity, variety and safety, budget control, employee satisfaction, and waste reduction through effective management systems and operational practices. It aims to streamline canteen activities, minimize costs, maintain hygiene, and enhance employee and stakeholder satisfaction.

2. Scope

This Canteen Management Strategy for LDC Group covers all aspects of canteen operations including:

- Menu planning
- Inventory control
- Financial management
- Vendor management
- Hygiene & safety
- Employee satisfaction
- Canteen system implementation

3. Terms and Definitions

- 3.1 Canteen Management System (CMS):** A system by which menu, inventory, financials, and feedback are managed.
- 3.2 Canteen Committee:** A formally appointed group, as per Bangladesh Labor Law, that oversees canteen operations, menu planning, and inventory control.
- 3.3 Menu Planning & Management:** Meals are scheduled, consumption is tracked, and dietary needs are ensured.
- 3.4 Inventory Control:** Stock levels are monitored to prevent overstocking or shortages.
- 3.5 Waste Management:** Food wastage is minimized through forecasting, portion control, and recycling.
- 3.6 Financial Management:** Expenses are tracked, bills are prepared, and reports are generated for transparency.
- 3.7 Vendor Management:** Reliable suppliers are selected, terms are negotiated, and timely delivery is ensured.
- 3.8 Employee Satisfaction:** Feedback is gathered, and the dining experience is enhanced.
- 3.9 Hygiene & Safety:** Food safety, sanitation, and cleanliness standards are maintained.

3.10 Cost Minimizing: Operational and financial practices are used to control costs.

4. Procedures

4.1 Implementing a Canteen Management System (CMS)

4.1.1 A Canteen Management Committee is to be established according to labor law.

4.1.2 Monthly menus are to be planned considering dietary needs, and consumption is to be tracked.

4.1.3 Regular inventory checks and item weighing are to be conducted to prevent overstocking or shortages.

4.1.4 Expenses are to be tracked, bills prepared, and detailed reports generated for transparency.

4.2 Operational Strategies

4.2.1 Menus are to be updated twice a year based on employee surveys and affordability.

4.2.2 Reliable vendors are to be partnered with, timely deliveries ensured, and company approval protocols followed.

4.2.3 Food waste is to be minimized by forecasting demand accurately, optimizing portion sizes, and implementing recycling programs.

4.3 Fostering Employee Satisfaction

4.3.1 Questionnaires are to be used to collect feedback on food quality, service, and menu preferences.

4.3.2 Handwashing facilities, drinking water, and cleaning protocols are to be maintained.

4.3.3 A comfortable and engaging dining experience is to be promoted.

4.4 Strengthen Financial and Administrative Controls

4.4.1 Financial goals are to be set to minimize operational costs and maximize satisfaction.

4.4.2 Suppliers are to be vetted for reliability, pricing, on-time delivery, and safety standards. Purchase history is to be tracked.

4.4.3 Transparency is to be maintained in all financial processes, and personal interest is to be excluded.

5. Policy Review and Improvement

The access control policy will be reviewed from time to time, subject to the necessity or policy improvement together with senior Management final approval.

6. Policy Review and Improvement

- Employees will receive training on this access control policy as part of their onboarding process.
- Regular refresher training will be conducted to ensure awareness and compliance.

7. Appendix

It is noted that local and international labor laws will be followed in this company, and the policy has been formulated in accordance with these regulations. The authority is committed to ensuring that operations are conducted in line with this policy.
